

Instructions

Congratulations on your purchase of the BabyBubu Baby Hammock, the 3-in-1 Cradle!

It grows with your child, can be used from birth up to infancy. Depending on the mounted variation can use BabyBubu as a baby cradle, hammock or hanging chair. Together with the available accessories, the BabyBubu Cradle is the ideal travel cot and that can be used almost everywhere. BabyBubu grows with your child: Our Starter-Pack is suitable for babies from 1-16 kg. We recommend the Update Kit for children up to 31 kg.

Please read the instructions carefully and keep them for future reference!

These instructions provide you with **important information** on the safe and comfortable use of the BabyBubu and should be observed when using the equipment.

You can find other languages on our website www.babybubu.de

BabyBubu

exploded assembly drawing

Mounting instructions

Mounting of suspension to the ceiling:

The following applies to all types of ceiling:

Suspension must be reliable and tightly fixed to the ceiling and withstand a heavy load. Rotting, defective ceilings or ceilings that for any other reason are not able to steadily withstand a load must not be used for mounting. If in doubt, please check the ceiling with qualified assistance and have mounting carried out by an expert.

Concrete ceilings:

- Drill a hole measuring approx. 10 mm wide and 70 mm deep with a concrete drill bit and insert the supplied dowel. The lower end of the dowel must be flush with the ceiling.
- Then screw the supplied ring bolt into the ceiling until the distance between ceiling and ring is 1 cm.

Wooden ceiling beam:

- If wood is used, please pre-drill. Use a drill with a diameter that corresponds to the core diameter of the screw (8 mm).
- Then screw the supplied ring bolt into the ceiling until the distance between ceiling and ring is 1 cm.

For any other kind of ceiling:

e.g. Gypsum, hollow ceilings, solid wood, etc. please consult an expert.

You may alternatively use our floor stand.

Mounting the Baby Cradle:

A sketch is included in these instructions as an aid.

1. Please attach the spring together with the chain and accessories to the ring bolt. Pay attention that the snap hook is closed and all individual parts are arranged as shown in the attached exploded assembly drawing.

! Important: Pay attention that the safety rope is connected to the snap hook above and below the spring and that the spring cover is pulled over the spring !

2. Open the baby hammock sling.
3. Fix the baby hammock sling with both rings to the safety carabiner and turn the safety closure round until completely locked. Please check that the safety closure is completely locked.
4. Place the wooden bar between both lengths of fabric by leading the fabric into the notch of the wooden bar. You may use the existing loops to fix the wooden bar but you can also vary the height.

(See: Adjustment of the lying position). Align the wooden bar in such a way that it is arranged horizontally to the bottom of the BabyBubu. Once you have fixed the right position please fasten the laces to prevent the lengths of fabric from slipping out.

5. Now you can slide the mattress in the opening on the underside of the hammock sling at the foot end.
6. Please note there is a velcro fastener inside the opening for the mattress to prevent this from shifting. Open it before sliding the mattress into the opening and close it as soon as the mattress is in the right position.
7. Now fold the remaining fabric at the end of the mattress (edge of the mattress) and turn it down under the mattress.
8. Before using the baby cradle, please check the distance between the baby hammock sling and the ground.

! Important: When using BabyBubu as a baby cradle it must be ensured that the lowest point of the BabyBubu, in the unloaded state, is 55cm above the ground !

9. If you then lay your baby down into the baby hammock sling, you can close it with the snap fasteners on the side.

If you have ordered the BabyBubu baby cradle directly from us as the manufacturer, you will find that we have carried out points 1 to 6 for you.

If you have decided to rent the baby cradle because you wish to try it out first, we recommend you use our door frame clamp for quick attachment of the baby cradle.

BabyBubu

Conversion of the basic mattress to BabyBubu with an XXL mattress

Remove the mattress

XXL mattress

BabyBubu with an XXL mattress

Please note:

You will find more safety instructions on page 8

- Child's head always points in the direction of the BabyBubu logo.
- Always use the rotating swivel between the spring and the baby hammock spring.
- Pay attention to the maximum weight of the spring used.
- **The sequence of the mounting must correspond to the exploded assembly drawing.**
- The unusual smell you might notice at first derives from the unbleached cotton and pure sheep's wool. This disappears by itself after a short time, after the first wash (*follow the washing instructions*) or you can hang the hammock sling in the fresh air for a while.
- It is not absolutely necessary to wash the BabyBubu baby cradle before first use, because the fabric used is pure, unbleached cotton that has not been treated chemically.

Adjustment of the lying position:

There is a small loop on each side of the length of the fabric of the hammock sling. These are required if the baby cradle is to be used as a hanging chair. If you use the BabyBubu as a baby cradle, these small loops serve as the orientation for the position of the wooden bar: the higher you attach the wooden bar above the small loops, the lower the top part. If the wooden bar is attached below the loops, the lying position is steeper. The top part goes up.

The length of the mattress in the BabyBubu starter pack is 80 cm. The length of time you can use this depends on the lying position of your baby.

As soon as the feet of the baby protrude out of the cradle, you can use the optionally available longer mattress.

The opening for inserting the mattress is on the underside of the hammock sling. Remove the existing mattress and push in the long mattress. The lying surface of the hammock sling is now completely filled out and there is no fabric left to turn under. Please check that the position of the wooden bar still enables the desired lying position (see "Adjustment of the lying position") before laying your baby in the baby cradle.

Hammock mounting:

If you prefer a more open lying position or you want to use a suitable stand, you can use the BabyBubu as a regular hammock for your baby. There must be no child in the cradle during conversion.

! The Hammock function may only be used without the Spring !

1. First remove the spring.
2. Attach the rings, that are sewn onto the baby hammock sling, with the help of snap locks to a suitable suspension for child hammocks.

Mounting the Hanging Chair: (from 3 to 10 years age)

If your infant is able to stand up, to walk or to climb on its own, you may turn BabyBubu Cradle into a Hanging Chair. There must be no child in the cradle during conversion.

! The Hanging Chair function may only be used without the Spring !

1. First remove the spring. The suspension with all other elements can be remain unchanged.
2. First remove the wooden bar and pass it through the loops of the top section of the BabyBuhu sling.
3. Then fix the ends of the wooden bar to the small loops on the lateral lengths of the fabric. Fasten the laces to prevent the lengths of fabric from slipping out.

Please note:

You will find more safety instructions on page 8

- Child's always head points in the direction of the BabyBubu logo.
- Please make sure that the distance between both rings in the expanded state is not less than 50 cm and maximum 120 cm.
- The maximum load of 20 kg must not be exceeded.
- If your child is not able to enter and leave the Hammock on its own, please use the optionally available retaining straps.
- The BabyBubu hammock function may only be used with the baby lying on its back.
- Please be careful when laying your child in the hammock.
- Under no circumstance load the hammock with jerky movements, e.g. jumping into the hammock or swinging the child into it.
- Select the height of the BabyBubu hammock such that your child is able to enter and leave it safely.

Please note:

You will find more safety instructions on page 8

- The BabyBuhu must not be used as a hanging chair until your child is able to enter and leave it on its own.
- The maximum load of 31 kg must not be exceeded.
- Since the wooden bar is necessary to ensure the chair unction (it would otherwise lead to a severe tensioning of the fabric) please pay attention to the fact that the distance between the two anchoring supports (round rings) must not exceed 52 cm.
- You may use an alternative suspension (e.g. existing swing frame or other similar 2-point suspension).
- Select the height of the BabyBubu hanging chair such that your child is able to enter and leave it safely.
- Under no circumstance load the hanging chair with jerky movements, e.g. jumping into it or swinging the child into it.

BabyBubu

Usage & Care Instructions

The BabyBubu is manufactured from high quality materials and ensures a long service life.

However, the service life depends on the frequency of use service life, washing, UV irradiation and other influences.

Before each use, please check the status of the fabric and the seams.

If you should notice any damage or fabric weakness please do not continue to use the defective article.

Before each use, please be aware of the stage of your child's development. If children are able to sit or stand up on their own, there is a risk that your child may slip or fall. The cradle

may therefore only be used under the constant supervision of a suitable person.

Please never bleach or dye the textiles and never exceed the maximum loading capacity indicated. This could damage the fabric and also the supporting parts to such an extent that the stability of the article is impaired. This leads to the risk of injury.

Washing Instructions

BabyBubu (without the mattress)

You can wash your BabyBubu (without the mattress) without any problem in a washing machine at a temperature of 40 degrees and you may also iron it carefully afterwards.

The sewn-in metal rings are normally no problem for your washing machine (if in doubt, please check the instructions of your washing machine).

! We recommend the use of a commercially available laundry net when washing!

Please keep in mind that our untreated cotton baby hammock may shrink up to 10% the first time it is washed.

Attention: Do not tumble dry.

Metal and Wooden parts

You can clean metal parts as well as wooden parts with a damp cloth.

BabyBubu mattress

The Mattress of BabyBubu mattress is filled with high quality sheep's wool. Do not wash the mattress in a washing machine.

If necessary, have the mattress dry-cleaned.

100% Baumwolle/Cotton

Sicherheitshinweise

- Bitte beachten Sie: die Sicherheit hat für die Benutzung unserer Produkte oberste Priorität. Beim Aufbau der Wiege und beim Anbringen der Aufhängevorrichtung dürfen nur einwandfreie und hochwertige Komponenten verwendet und fachmännisch verbaut werden. Dübel und sonstiges Befestigungsmaterial muss dem Typus der Decke entsprechen und einen sicheren und belastungsfesten Halt gewährleisten.
- Im Zweifel lassen Sie sich bitte durch qualifiziertes Personal beim Aufbau unterstützen (*Rufen Sie uns gerne an*).
- Die Wiege ist kein Turngerät und kein Kinderspielzeug. Aufstellung, Benutzung und Beaufsichtigung dürfen nur durch Erwachsene oder ausreichend eingewiesene, sachverständige, zuverlässige und ihrerseits beaufsichtigte Jugendliche erfolgen.
- Halten Sie die Verpackungsfolie von Babys und Kindern fern. Es besteht Erstickungsgefahr.
- **Zwischen Feder und Wiegebeutel, sowie zwischen Hängesessel und Deckenaufhängung, muss stets der Drehwirbel genutzt werden.**
- Das Material enthält Kleinteile, die in die Atemwege gelangen können. Halten Sie daher sämtliche Kleinteile des Sets zuverlässig außerhalb der Reichweite von Kindern.
- Die Wiege darf nur für die Rückenlage des Kindes verwendet werden. Das Legen des Kindes in Bauchlage kann zu schweren Sicherheitsrisiken führen.
- Die Hängesessel- & Hängemattenfunktion darf nur ohne die Feder genutzt werden.
- Die Benutzung der Wiege ist nur für jeweils ein Kind erlaubt. Die Benutzung mit mehreren Kindern gleichzeitig ist untersagt. Die genannten Belastungsgrenzen sind einzuhalten.
- Das eigenständige Verändern des Produktes ist verboten.
- Besteht die Möglichkeit, dass sich Ihr Kind bereits selbstständig aufsetzen könnte, ist die Benutzung der Federwiegen- und Hängemattenfunktion nur unter steter Aufsicht eines geeigneten Erwachsenen zulässig.
- Ist Ihr Baby in der Lage sich selbstständig aufzurichten und aus der Wiege herauszukrabbeln, legen Sie ein großes Kissen, kleine Matratze oder Ähnliches unter die Wiege.
- Denn bei Aufrichten des Kindes besteht die Gefahr des Herausfallens/Herausschleuderns.
- Lassen Sie Ihr Kind nie unbeaufsichtigt in der Wiege. Die Aufsicht sollte immer durch einen Erwachsenen erfolgen.
- Außer der Matratze, Originalzubehör und angemessenem Bettmaterial dürfen sich keine sonstigen Gegenstände in der Wiege befinden (Verletzungsgefahr).
- Nicht für Kinder verwenden, die zu groß oder zu schwer sind.
- Die Wiege darf nur in einem sicheren Umfeld verwendet werden. Bitte benutzen Sie die Wiege niemals in der Nähe von Hitzequellen (Heizstrahler, Lampen, Öfen, Kerzen usw.). Bitte beachten Sie, dass sich im Pendelbereich keine harten oder scharfkantigen Gegenstände befinden.
- Beachten Sie die Hinweise der Montageanleitung bezüglich Höhe und Art der Aufhängung. Für eine optimale Sicherheit empfehlen wir, stets die bei bestimmungsgemäßer Funktion niedrigste mögliche Liegeflächentiefe zu verwenden.
- Lassen Sie keine Kinder oder Tiere in der Nähe der Wiege unbeaufsichtigt spielen.
- Alle Teile der Wiege müssen vor jeder Benutzung auf Vollständigkeit, Beschädigungen, ordnungsgemäßen Sitz und evtl. Funktionseinschränkungen überprüft werden.
- Verwenden Sie die Wiege bei Beschädigungen oder fehlenden Teilen nicht, bis die fehlenden Teile ersetzt wurden oder der Mangel durch einen Fachmann beseitigt wurde.
- Verwenden Sie nur vom Hersteller bestätigtes Zubehör und Ersatzteile. Wir haften nicht für Fremtteile.
- Achten Sie darauf, dass Ihr Kind der Temperatur entsprechend gekleidet ist.
- Sorgen Sie stets dafür, dass eine freie und ungehinderte Atmung des Babys gewährleistet ist. Bettmaterial ist so auszuwählen, dass das Kind stets frei atmen kann und dass ein Verrutschen vor die Atemwege ausgeschlossen ist. Es dürfen keine Decken oder Tücher verwendet werden (Babyschlafsack möglich).
- Das Kind sollte so in die Wiege gelegt werden, dass der Kopf in Richtung des BabyBubu Logos zeigt.
- Sollten Sie sich noch nicht ganz sicher sein, dass Sie das alleinige Hineinlegen des Babys in die Wiege beherrschen, nehmen Sie eine zweite Person zur Hilfe.
- Transportieren Sie die Wiege niemals, wenn sich ein Kind darin befindet.
- Verwenden Sie die Feder ausschließlich, wenn das mitgelieferte Cover über die Feder gestülpt wurde, das Sicherheitsseil eingehängt ist und stecken Sie bei Benutzung niemals die Finger in die Feder.
- Weisen Sie alle Personen, die die Wiege benutzen wollen, über die oben aufgeführten Sicherheitsanweisungen ein.
- Sollte die Wiege nicht bestimmungsgemäß verwendet oder die Bedienungsanleitung nicht beachtet werden, entfallen insoweit jegliche Garantie- und Haftungsansprüche gegen die Famovy GmbH.
- Bewahren Sie diese Anleitung so auf, dass Sie diese jederzeit wiederfinden können und ggf. nachfolgenden Benutzern weitergeben können.
- Die vorstehenden Sicherheitshinweise gelten selbstverständlich auch für die Benutzung auf Reisen. Dies betrifft insbesondere die sichere Befestigung.

Safety Instructions

- Please note: Safety has the utmost priority when using of our products. When assembling the cradle and mounting the suspension, please use always flawless and high quality components and install them professionally. Dowels and other fixing material must correspond with the type of ceiling and must ensure a safe support that is able to withstand a load reliably.
- If in doubt, please have mounting carried out by an expert (You are welcome to give us a call).
- The cradle is not a gymnastic device or a toy for children. Assembly, usage and supervision may only be carried out only adults or by adolescents who have been sufficiently instructed, are experts and reliable and are themselves under supervision.
- Keep packaging film away from babies and children to avoid danger of suffocation.
- **The rotating swivel must always be used between the spring and the baby hammock sling as well as between the hanging chair and the ceiling suspension.**
- The material comprises small parts which can pass into the respiratory tract. Therefore, keep any small parts of the set reliably out of the reach of children.
- The cradle may only be used with the child lying on its back. Placing the child down on its tummy may entail serious safety risks.
- The hanging chair & regular hammock function may only be used without the spring.
- The use of the cradle is only permitted for one child at a time. The use with more than one child at the same time is not allowed. The loading capacity indicated must be observed.
- You are prohibited from modifying the product independently.
- If your child can stand up on its own, use of the hanging chair & regular hammock function is permissible only under the constant supervision of an appropriate adult.
- If your baby is able to stand up independently and crawl out of the cradle, place a large pillow, small mattress or similar under the cradle
- If your child stands up, there is a risk that it could slip or fall out.
- Never leave a child unattended in the cradle. Supervision should always be carried out by an adult.
- Apart from the mattress, original equipment and appropriate bed clothes no other objects must be positioned in the cradle (Danger of injury).
- Do not use the cradle for children who are too tall or too heavy.
- The cradle may only be used in a safe environment. Never use the cradle near any heat sources (heating units, lamps, ovens, candles etc.) Please note that hard or sharp-edged objects must not be placed within the swing range.
- Please observe the notes in the Mounting Instructions in regard to height and type of suspension. To ensure optimal safety we recommend you always use the lowest possible lying surface height of the intended function.
- Do not allow children or animals to play unattended near the cradle.
- Before each use, all parts of the cradle must be checked for completeness, damage, firm hold and possible functional impairment.
- Do not use the cradle if damaged or if parts are missing until the missing parts have been replaced or the defect has been remedied by an expert.
- Only use replacements and accessories specified by the manufacturer. We are not liable in the case third-party parts are used.
- Make sure that your child is dressed properly for the ambient temperature.
- Always make sure that your baby can breathe freely and unimpeded. Choose bed clothing such that your child can breathe freely and that cannot slip directly in front of the respiratory tract. You must not use blankets or sheets (*a baby's sleeping bag is permitted*).
- Please always place your child in the cradle in such a way that child's head points in the direction of the BabyBubu logo.
- If you still do not feel confident about putting your baby into the cradle on your own, please call a second person who can assist you.
- No child may be in the cradle during transport.
- Please use the spring only if the cover provided is pulled over it and if safety rope is connected. When in use, do not put your fingers into the spring.
- All persons wishing to use the cradle must be shown how to operate it properly and safely pursuant to above-mentioned Safety Instructions.
- All warranty and liability claims against Famovy GmbH shall become null and void in the event the cradle is not be used as intended or the instructions for use are not observed.
- Please keep these instructions where you can find them easily and can pass them on to possible subsequent users.
- The above-mentioned information on safety applies also if you use the BuBu while traveling. This applies in particular in regard to a safe fixation.
