## Door Clamp

### Delivery Content Lieferumfang

Accessory for  
Starter Paket  
up to 15 kg

### Instructions for use

**Congratulations on your purchase of the  
BabyBubu Door Clamp!**

**Please read the instruction carefully and keep  
them for future reference!**

It is essential to follow the **safety instructions**  
and additional information for handling your  
**BabyBubu Hammock!**

Please keep the packing material away from  
children! Packing material may constitute a  
suffocation hazard!

#### Application at door frames:

**! The maximum loading capacity of the Door Clamp is 15kg  
(incl. 2kg Cradle and max. 13kg child) !**

- The Door Clamp shall be positioned centrally and needs a contact area of at least 5mm per side of the door frame. That means that the distance between frame and wall has to be not less than 5 mm.
- The depth of the door frame shall be 30 cm in maximum.
- Please check both the Door Clamp and as well BabyBubu suspension together with Baby Hammock Sling for damage before using. Should the product be impaired or defective, please do not use it!
- Before fixing the Door Clamp please check if fixing material / supporting surface is lastingly suitable and if the fixing material is able to absorb all forces arising.
- Secure the door to avoid the door accidentally closing! The locking device must be sufficiently resistant to hold the door open to prevent that the door gets in the swing area of the Cradle (risk of injury).
- Tighten the safety belt at the door Clamp before attaching the BabyBubu Hammock.
- After mounting of the Clamp please check the stability and durability of the fastening.
- Do not use the BabyBubu Cradle for children which are already too large or heavy.

- You should use the Door Clamp only for gentle motion up and down, not for rocking movements. Make particularly sure that Cradle and Door Clamp will not be pushed (e.g. by children).
- Stretch the Clamp only as much as necessary for the door frame. Do not excessive stretch the Door Clamp to avoid deforming. If the Clamp is deformed, you should not use it anymore.
- If you use BabyBubu as a Baby Hammock, the lowest point of your BabyBubu, in the unloaded state, shall be 50cm above the ground.
- For safety reasons, please place a sufficiently large pillow or mattress under the BabyBubu Cradle.
- Make always sure that you never mount the Cradle near open fire places or any other heat sources such like electrical radiant heating, gas furnaces, etc.
- Any changes to Door Clamp and/or BabyBubu Cradle are prohibited.
- We are not liable for damages emerging through any changes to the condition of the product!
- Make sure that the Cradle is preferably suspended in a right angle to the door!

### Important Safety Instructions

#### Wichtige Sicherheitshinweise | Important instructions de sécurité | importante Avvisi di sicurezza

- |   |  |   |  |
|---|--|---|--|
| 1. Kein Spielzeug!  | 1. This is not a toy!  | 1. Le berceau n'est pas un jouet!   | 1. Non è un giocattolo!  |
| 2. Nur unter Aufsicht<br>Erwachsener verwenden!   | 2. To be used only under<br>supervision of adults!                               | 2. Utiliser seulement sous<br>surveillance d'un adulte!                                 | 2. Usare solo sotto la super-<br>visione di un adulto!   |
